Questo screenshot mostra la configurazione della chiave API di Brevo all'interno di Shopify. Ho collegato correttamente il mio account Brevo a Shopify, utilizzando la chiave API per sincronizzare i dati tra le due piattaforme.

In questo screenshot è visibile la selezione del mio canale account. Ho scelto il mio account Brevo (Federica Mazza) per connetterlo a Shopify.

Questo screenshot mostra la configurazione degli eventi di Sendinblue (Brevo) all'interno di Shopify. Ho selezionato il webhook topic di Shopify (ad esempio, **orders/create**) e l'evento corrispondente di Brevo, mappando i campi tra le due piattaforme. Tra i dati configurati, troviamo l'email del cliente, il nome del mittente, l'email di risposta e altri dettagli che vengono automaticamente inviati ai clienti quando effettuano un ordine.
